**College Campus Bird Survey**

Department of Zoology conducted College Campus Bird Survey scheduled on December-2022 to February-2023 under valuable guidance of Dr. Sudhakar Kurhade, former Professor of Zoology, New Arts Commerce & Science College, Shevgaon. The total number of Campus bird Count was 74 birds. In this survey 30 students from SYBSc and TYBSc Zoology had participated. At the time of survey of the birds, Dr. Sudhakar Kurhade gave information of birds which included-migratory birds, types of migration, advantages & disadvantages of migration, beaks & feet modification of birds. Birds are important members of many ecosystems. They play a vital role in controlling pests, acting as pollinators, and maintaining island ecology. In addition, birds are important to humans in many ways, such as serving as a source of food and providing fertilizer in agricultural settings. They have a dual role in agriculture in which some of them aid in pollinating the wild plants, contribute to soil fertility, and play a key role in pest and rodent control. On the other hand, they inflict serious damage to agricultural and horticultural crops by feeding on grains and ripened fruits.
