From the academic year 2014-15, the skill- based courses for 4 credits have been incorporated in the curriculum of Post-graduate degree programmes of Savitribai Phule Pune University.

Evaluation comprises of the ***Internal Assessment*** on the basis of following components:

Table No. 1: Components of Evaluation

Sr. No.	Evaluation Head	Marks
1.	Skill-based practical work	60
2.	Written Test I	20
3.	Written Test II	20
	Total Marks	**100**

I. Evaluation of Skill-based Practical work:

Course- related skill-based practical work will be entirely based on the skills to be developed in the students. It may include the topics as has been prescribed in the syllabi of every course. Practical components may be based on laboratory work, on job industrial training, working with NGO or similar organizations, project, field work, group discussion, presentation etc. ***unless otherwise clearly specified*** in the given syllabi of all the courses.

College is supposed to maintain the record of marks allotted to the practical work carried out by the students.

The following criteria can be used for designing the tool for evaluation of practical work.

A. For Science and technical subjects:

The criteria as indicated below are suggestive and you may refer to it as a guideline for designing your own tool for evaluation if necessary. However, evaluation of each student for practical work must be done objectively and should be based on actual supervision by the trainer.

Skill Enhancement Courses (SEC)

a) Selection of Skill enhancement courses

There are two skill enhancement courses (SEC) in 5th semester (PHY-3510 and PHY-3511). For 5th semester, there are four options available. The college has to select any one from the given four options. It is advised that college should not offer elective and skill enhancement course of same theme.

b) Teaching Learning process for Skill Enhancement Courses

Skill base courses are intended to explore the applications of physics knowledge. Learning in skill enhancement courses is largely experience based. The skill enhancement courses may be categorized as knowledge skill or technical skill. For knowledge skill courses one can use the conventional method for teaching along with problem solving, assignments seminars etc. For acquiring the technical skill, the students will get adequate 'hands-on' experience. The teachers may use demonstrations and activity-based learning techniques. On field visits, study tour and mini projects will enrich the learning experience of the students.

c) Assessment methods for skill enhancement courses

Continuous evaluation will be the best method for assessment of skill enhancement courses.

One can use tools like assignments, mini projects or activities, problems, etc and grade the students according to their performance. The internal assessment should have 50 % weightage.

The University examination may be conducted for the remaining 50%.

The University examination question paper should have adequate proportion of objective and subjective question.
